copy 2

To Subscribers.

In presenting the second and enlarged edition of the White Directory, the publishers call attention to the fact that certain lines of manufacture omitted purposely from the first edition have been embodied in this work. The present edition also furnishes the names of cabinet makers and upholsterers and the express company or companies which are found in each city or town. The value of the White Directory has been proved by use and the present edition will be found even more useful than the former one.
